

PUSH Foreclosure Submission System

What is PUSH?

PUSH is a web-based solution designed by GTS to enable subscribed law firms to submit foreclosure data and documentation to Public Trustees in counties subscribed to GTSDData.

How Does PUSH Work?

PUSH is relatively simple. PUSH takes pertinent foreclosure information and documentation law firms and stores it in such a way that the appropriate Public Trustee can find it by using another GTS solution, Ready Queue.

How Is PUSH Used?

Foreclosure Submission System

Financial

push@gts.com

Law firm users log into PUSH just like they would for any secure web site. After logging in the user fills out a series of web-based forms with relevant foreclosure information. The user also selects scanned documents (in TIF format) for uploading to a file server. Upon completion PUSH inserts all relevant form-entered foreclosure data into a relational database, uploads selected scanned documents to a file server, and then notifies the appropriate Public trustee of the submitted foreclosure. The Public Trustee then uses GTS' Ready Queue web application to retrieve, review and begin processing the submitted foreclosure.

Who Is Push For?

PUSH was conceived as a low-cost, efficient foreclosure submission system for law firms that wish to use eForeclosure as a part of their practice but don't want a desktop or custom solution. PUSH is ideal for firms that do foreclosures but not in high volume.

What Is The Benefit of Using PUSH?

Ease of Use

PUSH is incredibly easy to use.

Cost Effective

The cost of using PUSH for eForeclosure is very inexpensive.

Always Available

PUSH does not sleep or take days off. It's available for use 24 hours per day, 7 days a week, all year.

Time Savings

Probably the greatest benefit in using the PUSH foreclosure submission system is in time savings. No more having to rely on couriers to transport foreclosure submissions. Submissions can reach the appropriate Public Trustee's office in a matter of seconds. Equally, the time required to deliver communications from the Public Trustee's office to the submitting law firm is also reduced to seconds.

How Do I Get Access To PUSH?
